STRAIGHTENER & CUTTER MSR – ARV 16/6 - 2BK/ 1 TW.

Manufacturer: PROGRESS MASCHINEN & AUTOMATION – ITALIA

The ability to process steel of vastly varying quality and still achieve consistent results is of overriding importance. **Progress** rotor straightening technology assures constant straightening results and exceptional processing quality of all steel types in compliance with even the most severe standards.

We can also offer you a large variety of customized solutions for efficient material handling.

CHARACTERISTICS

•	Wire diameter range	6-16 mm.
•	Diameter changeover	completely automatic in 6 secs. approx.
•	Connected load	3 x 400 V – 50/60 Hz
•	Number of pay-offs	6
	Type of pay-offs	RMF 5000 - 6 (Driven and braked in sync with wire feed).
	Max. coil weight	5.000 kg.
	Vario-rotor	YES
•	Flying shear	YES
•	Max. wire feed speed	140 m/min

Flying shear

Tying system

Material collecting carriage

PRICE AND CONDITIONS:

#4 STRAIGHTENER & CUTTER MSR – ARV 16/6 -2BK/ 1 TW.

Purchasing date : 11-02-2.008. Few working hours.
Machine acquisition price (new) : 623.380 € , VAT not included

SALE PRICE: PLEASE, ASK US.
