Specifications:

VACUUM THERMOFORMER MACHINE MOBEPACK F 42.30

Package formats:

3x2 standard, 2 guillotine, with photocell, outlet conveyor belt.

Film width: 420 mm.

Advance: 300 mm.

•Thermoformer depth up to 150 mm
•Stroke length up to 750mm (longer length upon demand)
•Film width up to 620 mm
•Special die sets and customized easy-to-open systems
•Shape cutting of flexible packagings
•Flexible & rigid film and skin pack packaging

EXTREMELY EASY USE AND OPERATION

•Quick and easy die set exchange without special tools
•Easy access to the thermoforming and sealing die set
•Easy to operate printed film centering system
•Turning colour touch screen

STANDARD EQUIPMENT

: AL0501111

•Modular design made completely of stainless steel
•New hygienic design without dead spaces and inaccessible niches
•Lateral protections made of stainless steel: solid and enduring
•Electrical and electronic components in a stainless steel cabinet
•Top and bottom reel holder with pneumatic disk brake system
•Expanding reel holder
•Top and bottom reel maximum diameter 500mm (400 mm in Mobi model)
•Extended loading area according to clients needs
•Independent lifting system of thermoforming and sealing stations

SECURITY AND HYGIENE

•Design and construction following EU regulations
•Hygienic design of every piece
•Polished welding points avoiding dead spaces and inaccesible niches
•Cleaning program

MACHINES FOR AN INTENSIVE USE

•Thermoformers designed for an intensive and continued use
•Reinforced lifting system
•Solid and reliable reel holders
•Compact and solid die sets
•Reliable cutting systems
•Solid and strong structural elements fixed onto the modular construction
