Specifications:

An small , compact and powerful screw unit that meets all the needs of your shop compressed air

The PKM 10 hp range do not need more than 1 m² for supplying compressed air in your workspace. The PKM compressor mounted on the floor can be used as an extension of your existing air system or can be installed near the place of use. The tank mounted PKM (270 or 500 l) is an autonomous system with a low noise level. This is also an important advantage of the PKM version dryer all in one , which is perfect when compressed air needs a low dew point . You may have filters and accessories for compressed air demands with low oil . The PKM range includes small power units , compact , economical and very reliable low maintenance .

Key benefits:

first-class components

tank unit available in 2 sizes : 270 l 500 l

energy savings thanks to lower power engine

: IN0160414

compact installation

small dimensions ; 1.2 m²

easy access for maintenance

compression element high efficiency

thermal protection

efficient cooling

long maintenance intervals

external check oil level

The controller 99 adjusts the ES motor speed to the required air consumption , reducing energy costs

automatic condensate trap ; purge only water and no air leak

low noise

Optional filters and dryers for a perfect air filtration

Weight: 168 Kg

Dimensions (mm): 810x 590 x 980 H

: IN0160414

Product Number: 4152002326

N: CAI233658

Voltage: 400 Vac, 3 Ph

Frequency: 50 Hz

Power: 7.5 KW
